

Group 3

yeet.

The Map

Entire Game Flow

Add Armies

Turn Number: 0 //so Rahul2's turn

Players Turn Order:

1. Rahul2
2. Rahul1
3. Rahul3

Countries:

1. Country1: 1, Rahul2
2. Country2: 3, Rahul3
3. Country3: 4, Rahul1
4. Country4
5. Country5
6. Country6: 3, Rahul1

End Turn

Calculate current player turn using turn number modulo number of players -> update number of placeable armies -> on click, decrement player placeable armies, increment territory armies -> on 0 placeable armies -> POST request to end turn -> turn number incremented -> repeat loop

Attack Phase

Player chooses
attacking and
defending territory
and allow attacker
and defender to
choose # of dice

Attack Phase

Functionality

- Roll 1-3 dice for the attacker and 1-2 for the defender.
- Choose the highest die from both players and compare.
- Decrement 1 army from losing player (attacker loses in the case of tie)
- Repeat for the second highest dice for both players if both players rolled more than 1 dice.

Repeat or...

End Turn

http://****/endTurn/:gameId

Functionality

- Increment turn #
